

CalcMyCrypto Application

“The app that calculates the current value of your crypto in traditional currencies like dollars or euros”

Description

Calcmycrypto is an application for everyone, mostly for cryptocurrency users which offers real time conversion rates. You can simply insert the value of the crypto you want to convert and the app calculates the current value of your crypto in traditional currencies like dollars or euros. It solves the problem of the highly unstable cryptocurrency market rates with accurate and up to date conversion rates.

App functions

1. Calculates the crypto value to traditional currencies
2. Calculates traditional currencies to crypto
3. Get informed about latest news of cryptocurrencies
4. Create an account for future uses

Target user groups

1. Crypto investors
2. Traders
3. Individuals interested in cryptocurrencies but not necessarily active investors or traders
4. Individuals that may use cryptocurrencies as an alternative form of payment.

Sample user profile

One of the potential users is Katerina, she is 29 years old and she invested in bitcoin 2 years ago. She is a teacher and lives in Thessaloniki Greece. She lives with her husband and they share an interest in cryptocurrency in their spare time.

Client/Designer goals

1. Provide a usefull app
2. Make some money
3. Building a community
4. Collecting data from users

Related apps/products
